National Broadcast Quality/High Definition (HD) Equipment

We are a professional, fully mobile broadcast quality production company. We utilize the following industry leading equipment and deliver on the highest quality media.

Leading Edge High Definition Delivery on Blu-ray

We are one of the few production companies with full in-house authoring and mastering capabilities for Blu-ray. This leading edge format delivers full high definition (HD) picture quality that far surpasses standard definition (SD) DVD. We offer full graphic design and interactivity authoring for true Hollywood style video/animated menus for a true cinema quality experience.

1. We record in DVCPRO 50 or DVCPRO HD using the Panasonic AG-HVX200 (high definition/HD) with 4 x 4 Petroff Matte Box (pictured). The camera features include:
 - a. True high definition image quality
 - b. 16:9 native high-sensitivity progressive 3-CCD with 1080/60p scanning
 - c. New DSP with 14-bit A/D conversion and 19-bit internal processing
 - d. 16:9/4:3 switchable for standard definition recording, 16:9 native for HD
 - e. Wide angle Leica Dicomar HD lens with optical image stabilizer
 - f. 13X zoom range: focal length = 4.2 to 55mm (35mm equivalent: 32.5 to 423)
 - g. Advanced gamma functions and eight gamma settings including two CineGamma™ modes
 - h. Advanced image adjustments: color matrix, detail, chroma phase, color temp
 - i. 48kHz 16-bit 4-channel PCM audio (2 XLRs with phantom power)
 - j. External recording to FOCUS FireStore FS-100 via IEEE 1394 streaming
 - k. SMPTE timecode reader/generator with timecode matching with multiple cameras
 - l. Ultra-tough magnesium alloy chassis

2. We edit on a Macintosh dedicated edit station running Apple's Final Cut Pro Studio. The Studio suite of programs includes Final Cut Pro as well as Motion (for graphics and effects), Color (for consistent professional color correction), Compressor (for professional compression for DVD) and DVD Studio Pro (for professional DVD authoring). **We store all footage and edit files on a RAID 5 system provides the ultimate in file security (redundancy to eliminate file loss due to drive failure).**
3. We record direct to digital hard drive using the Focus Enhancement Firestore FS-100 (pictured at right). (<http://www.focusinfo.com/solutions/catalog.asp?id=150>), not to tape, so no digitizing of footage from analog to digital is necessary where quality may be lost. We also use industry leading P2 memory card technology from Panasonic. This feature significantly enhances image quality and allows us to immediately review scenes during filming and aides in an efficient production.
4. Sennheiser wireless lavalier and shotgun microphones for professional quality audio of interview and ambient sound.
5. ARRI and Lowell Lighting Kits (pictured).
6. 40 feet of track and dolly (pictured) in addition to a portable doorway dolly for moving camera shots with smooth motion in any setting.
7. 10-foot Jimmy Jib (camera crane for smooth raising and lowering movements)

This equipment allows us to produce scenes audiences have grown accustomed to seeing in movies, such as moving dolly shots and raising and lowering jib shots. We produce videos as the highest quality possible that is broadcast quality, minimum.

Instructions For Placing Orders For Services Based On GSA Schedule Hourly Rates

GSA provides a streamlined, efficient process for ordering the services you need. GSA has already determined that Effective Digital Presentations (EDP) meets the technical requirements and that our prices offered are fair and reasonable. Agencies may use written orders; facsimile orders, credit card orders, blanket purchase agreement orders or individual purchase orders under this contract.

If it is determined that your agency needs an outside source to provide AIMS services, follow these simple steps:

Step 1. Develop a Statement of Work (SOW)

In the SOW, include the following information:

- Work to be performed
- Location of work
- Period of performance
- Deliverable schedule, and
- Special standards and any special requirements, where applicable

Step 2. Select Contractor and Place Order

- If the order is at or below the micro-purchase threshold, select the contractor best suited for your needs and place the order.
- If the order is exceeding but less than the maximum order threshold (MOT), prepare an RFQ;
- If the order is in excess of the MOT, prepare an RFQ. Consider expansion of competition and seek price reductions.

Step 3. Prepare a Request for Quote (RFQ)

- Include the SOW and evaluation criteria
- Request fixed price, ceiling price, or, if not possible, labor hour or time and materials order
- If preferred, request a performance plan from contractors and information on past experience; and include information on the basis for selection
- May be posted on GSA's electronic RFQ system, e-Buy

Step 4. Provide RFQ to at least Three Firms

Step 5. Evaluate Offers, Select Best Value Firm, and Place Order

Blanket Purchase Agreement

Ordering activities may establish BPAs under any schedule contract to fill repetitive needs for supplies or services. BPAs may be established with one or more schedule contractors. The number of BPAs to be established is within the discretion of the ordering activity establishing the BPAs and should be based on a strategy that is expected to maximize the effectiveness of the BPA(s). In determining how many BPAs to establish, consider:

- The scope and complexity of the requirement(s);
- The need to periodically compare multiple technical approaches or prices;
- The administrative costs of BPAs; and
- The technical qualifications of the schedule contractor(s)

Establishment of a single BPA, or multiple BPAs, shall be made using the same procedures outlined in 8.405-1 or 8.405-2. BPAs shall address the frequency of ordering, invoicing, discounts, requirements (*e.g.* estimated quantities, work to be performed), delivery locations, and time.

When establishing multiple BPAs, the ordering activity shall specify the procedures for placing orders under the BPAs.

Establishment of a multi-agency BPA against a Federal Supply Schedule contract is permitted if the multi-agency BPA identifies the participating agencies and their estimated requirements at the time the BPA is established.

Ordering from BPAs:

Single BPA. If the ordering activity establishes one BPA, authorized users may place the order directly under the established BPA when the need for the supply or service arises.

Multiple BPAs. If the ordering activity establishes multiple BPAs, before placing an order exceeding the micro-purchase threshold, the ordering activity shall:

- Forward the requirement, or statement of work and the evaluation criteria, to an appropriate number of BPA holders, as established in the BPA ordering procedures; and
- Evaluate the responses received, make a best value determination (see 8.404(d)), and place the order with the BPA holder that represents the best value.

BPAs for hourly rate services. If the BPA is for hourly rate services, the ordering activity shall develop a statement of work for requirements covered by the BPA. All orders under the BPA shall specify a price for the performance of the tasks identified in the statement of work.

Duration of BPAs. BPAs generally should not exceed five years in length, but may do so to meet program requirements. Contractors may be awarded BPAs that extend beyond the current term of their GSA Schedule contract, so long as there are option periods in their GSA Schedule contract that, if exercised, will cover the BPA's period of performance.

Review of BPAs:

The ordering activity that established the BPA shall review it at least once a year to determine whether:

- The schedule contract, upon which the BPA was established, is still in effect;
- The BPA still represents the best value (see 8.404(d)); and
- Estimated quantities/amounts have been exceeded and additional price reductions can be obtained.

The ordering activity shall document the results of its review.
